

FILIP DUKAT

FRONTEND DEVELOPER

Profile Info

I am a self-taught software developer who loves to create beautiful and user-friendly applications. I believe that creating software is like writing a novel with a team of co-writers where consistency and communication is a key. I am a goal-oriented person, always wanting to improve my skills, open for challenges and happy to learn from feedback. Currently I specialize in React ecosystem and frontend development but I am keen on learning new things, tools and strategies to get things done.

Experience

Frontend Developer

2021 - 2022

[Andersen](#) | [Letter of recommendation](#)

Working in an international team composed of professionals in different areas of expertise. Developing applications for clients mainly in fintech industry. Maintaining existing codebases, reviewing code and optimizing performance bottlenecks.

Stack: React, Typescript, MUI, Jest, Redux, Github, Styled Components, AWS

Frontend Developer

2020 - 2021

Freelancing

Creating web applications for individual clients and small businesses. Developing responsive interfaces with attention to detail, UX and a11y practices.

Stack: React, Typescript, Redux, Github, Styled Components

Expertise

React, Next.js, Redux

CSS, Sass, Styled Components

Typescript

Rest APIs, GraphQL

Communication

Analytical Thinking

Creativity

Other activities

Speaker

Frontend Hero Meetup

Attending internal company meetup where I hosted presentation called "Accessibility in modern web applications" about a11y practices and why it is important to create websites that are friendly for everyone.

Expert

[Js13kGames](#)

Reviewing work of competitors in game development hackathon in which main goal was to create a game in Javascript that will be no bigger than 13kB after compression. During this hackathon, I also attended an interview about beginner programming tips, game development industry and technology in general.
